iCan Create a Book in iPhoto

1. Open iPhoto.

2. Select (or create) an album of photos.

3. Select the “book” feature icon at the bottom.

4. Select your options: theme, size, and cover type.

5. Drag a photo from the top shelf into the cover template. You may also type in a title and subtitle.
6. Use the arrows at the bottom to turn pages.

7. Select the number of pictures that you want to place on each page.

8. Select the layout of each page. (Some contain text boxes.)

9. Continue dragging photos from the top shelf into your template.

10. Type in your captions.
11. When done, click on the “buy book” button at the bottom. Select your cover color (if hard cover) and quantity. Then you can either create an account or login to an existing account to complete your purchase.

12. Hard covers go for $30 and softcovers go for $20 (large) and $10 (medium). My personal recommendation is the large softcover option for $20. Books are well-packed, and will ship to your doorstep in about 3-4 days.
