

## LULU'S LEMONADE FACTORY

with others. These grapefruits. Sometimes twins. This year a fruit fence that borders our removed easily. The tree and through the fence,

calls for only 2 cups of concentrate for 6-8 servings? Use your mathematical skills to calculate Lulu's income for 3-1/2 gallons of concentrate. Practice your BASIC MATH 100 skills.

Freshly picked lemons from our backyard are processed especially for our famous lemonade and lemon bars. A mouth-watering lemon Bundt cake has recently been added to the Lulu's Lemon Bake List. We also share the fruit or concentrate

lemons grow as big as they grow into Siamese grew through our chain link property and cannot be branches grow freely over creeping into our neighbor's territory. Our crops have been plentiful. A little bit of trimming and care will allow the over 30 year old tree to fruit and provide more healthy lemons. Three large, recyclable plastic bags of lemons yielded approximately 3-1/2 gallons of concentrate.

Can you imagine how many 12 oz. cups at \$1 per cup of lemonade Lulu can sell at her lemonade stand if a recipe

This is sustainable country living. Plant a lemon tree, nurture it, appreciate it and share its fruits. The factory should be busy for many years as long as the cycle is continuous.

What is the plan for this lemon stuck in the fence? We will free it with a slice to save its sunshiny juice and zest. Enjoy the fruits that you received from our backyard.
