Accessing a Wireless Network on Your PC
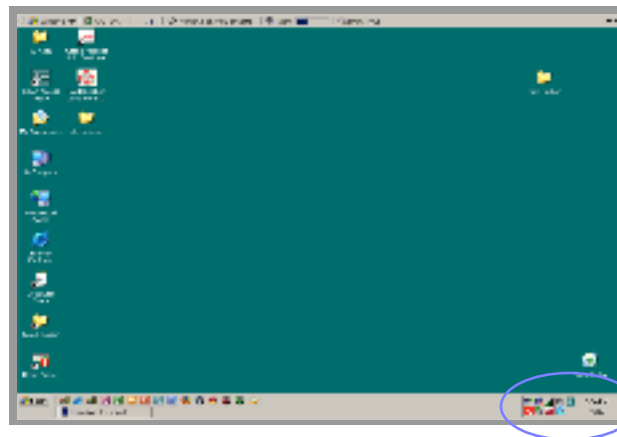

Instructions and Tips for Accessing the Wireless Network on Kapālama Campus or at Home

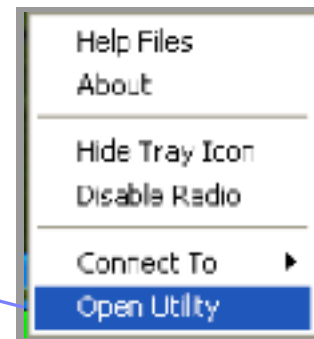

System Utility Tray

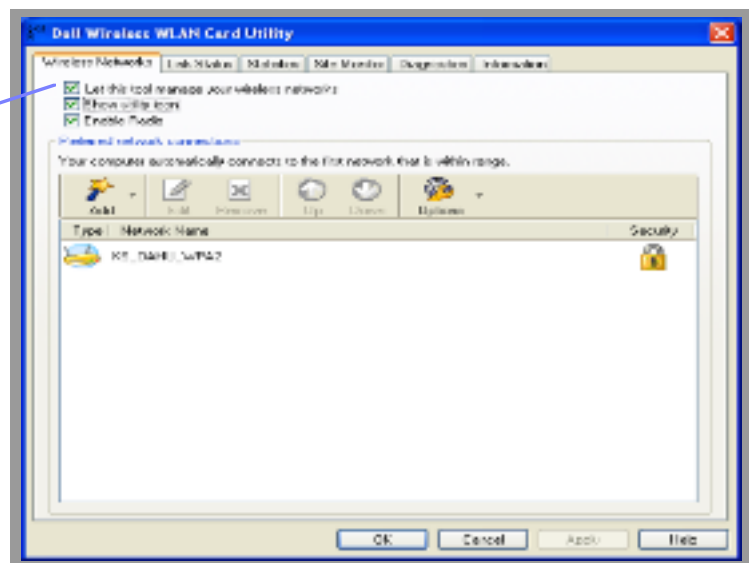

KAPĀLAMA CAMPUS ACCESS

1. Right-click on the True Mobile **wireless utility** icon (stairs or bars) in the system utility tray. A menu will appear.

2. From the pop-up menu, select **Open Utility**.

3. The Dell Wireless WLAN Card Utility window will open.

Check the first option (*Let this tool manage your wireless networks*).

*** For faster access, **we recommend that you plug into the network using a network cable** to access **Class XP.**

When you do this, *ALWAYS DISABLE the RADIO SETTING when connecting to the network.* Right-click on the **True Mobile wireless utility** icon in the system utility tray. A menu will appear.
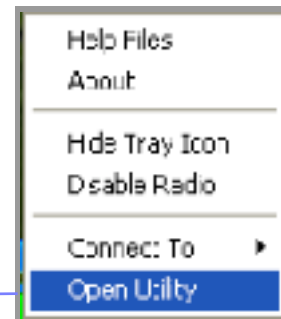

From the pop-up menu, select **Disable Radio.**

HOME ACCESS

*(These instructions are for those who have a wireless network setup at home.)*

1. Right-click on the True Mobile **wireless utility** icon (stairs or bars) in the system utility tray. A menu will appear.

2. From the pop-up menu, select **Open Utility.**

3. The **Dell Wireless WLAN Card Utility** window will open.

Uncheck the first option (*Let this tool manage your wireless networks*).

This will allow the Windows wireless utility to control the laptop's wireless card and connect to your home wireless network.

4. Check that your *RADIO SETTING is ENABLED.* Right-click on the **True Mobile wireless utility** icon in the system utility tray. A menu will appear.

From the pop-up menu, select **Enable Radio.**
