

Alexandria and the Recycling Bin

Written & Illustrated by Brooke
Anuheia Burns

“Hey!! Don’t just drop me on the ground like I’m nothing. I just so happen to have feelings!!! My name is Alexandria. Although I might be just a small little plastic bottle I still know a lot about the world.”

People can recycle bottles! You can recycle, aluminum cans, paper and many more. The more that we recycle the better the earth will be. A reward that people get for recycling is that for every bottle you recycle you get 5 cents. In Hawai'i u get 6 cents for every can you recycle.

WE RECYCLE

When we go to a landfill we see that it is filled with all plastic products. I heard from my friend that every single piece of plastic ever made is still on this earth. I could be stuck on earth doing nothing for years and years.

Something else we can do is the 3 R's: reduce, reuse, and recycle. We can reduce our usage of water and electricity. We can reuse some on our products like reuse paper. Lastly we can recycle everything that we cannot reuse.

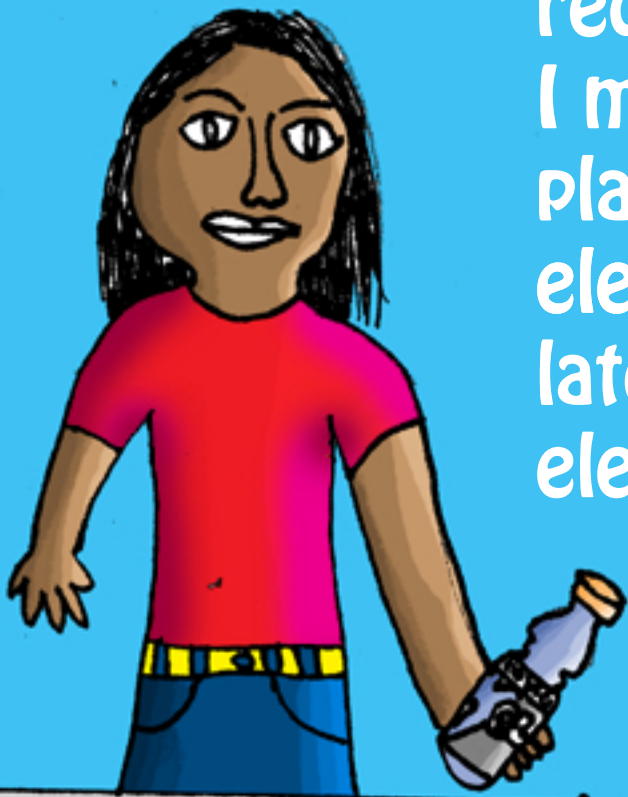

I read online that it takes about 1 million years for a milk jug to decompose...

“Whoa... Why am I being picked up?? Hello? Can anyone hear me?”

Oh it's a human... she is taking me to a recycling bin! Yes I will have a better life helping and reducing the waste in our landfill. I might get to go to the H-Power plant and be burned to make electricity! See you guys all later... I might even be your electricity.

PLASTIC

GLASS

PAPER
