

Showers Tell All

By: Paige Chang

Rin was getting ready to take a shower. She had just put down her things when a voice said, "Rin..."

"Who's there?" she called, unsure of where the voice came from.

"Look up..." the voice replied

Looking up, she saw that her showerhead was talking!
“Hello,” it said, “my name is Sean!”

“Hello... Sean...” she said unsurely. “Um...
why are you talking to me?”

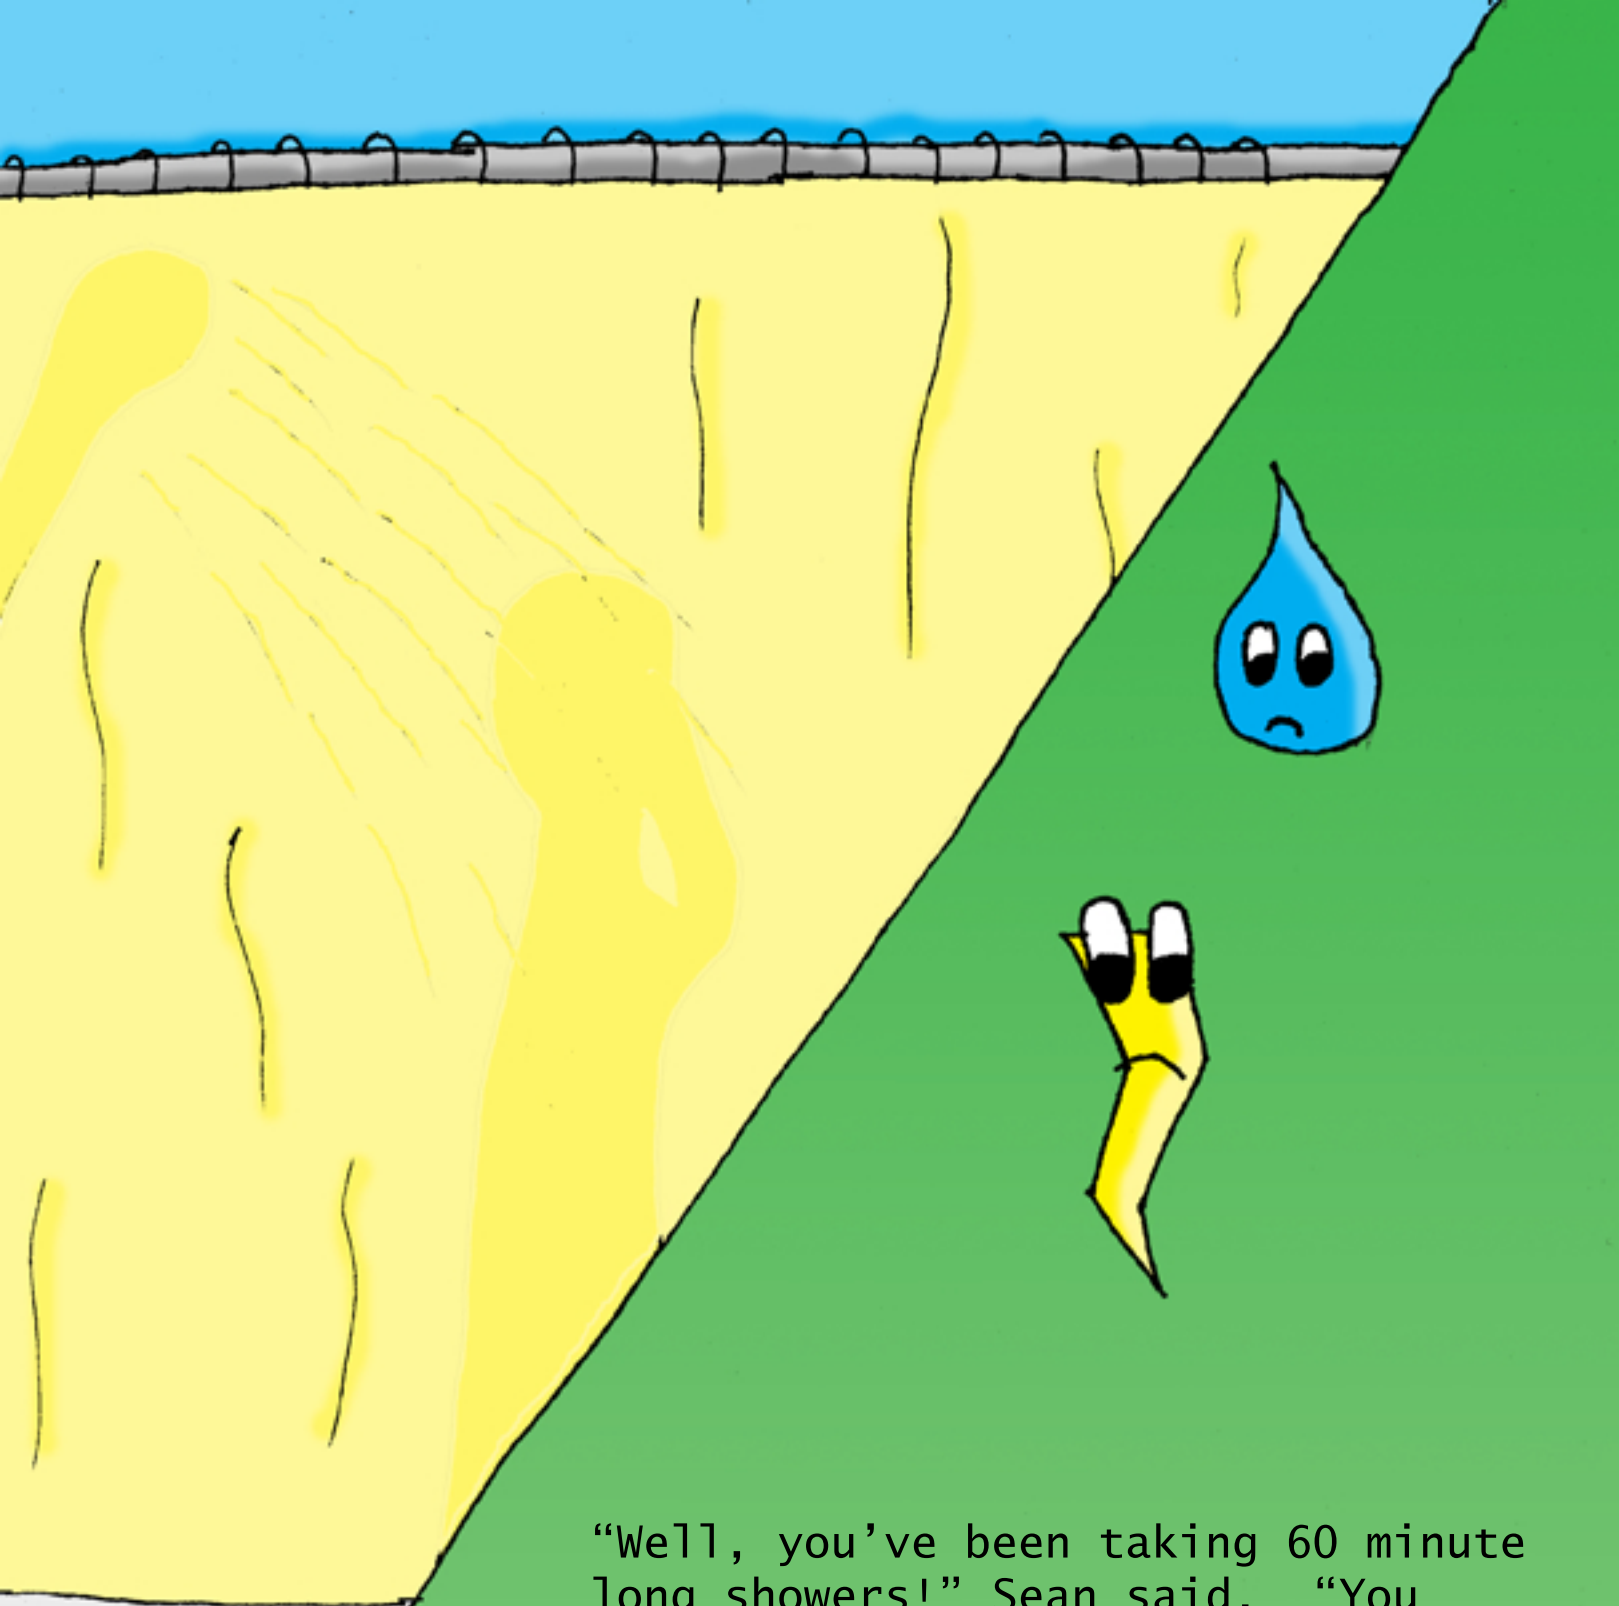

“Look, do you like showering?” he asked.

“Yes, why?” she
asked.

“Do you care about
our planet?” Sean
asked again.

“Yesssss...” she said
again.

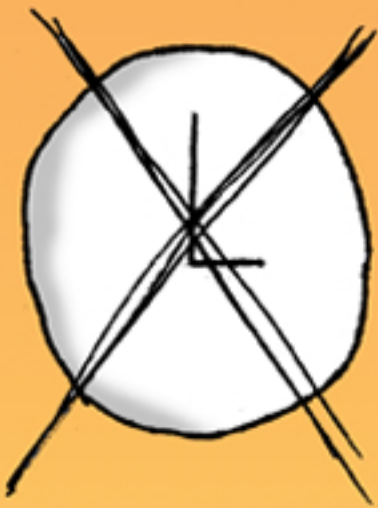

“Well, you’ve been taking 60 minute long showers!” Sean said. “You waste 7 gallons of water for every minute you spend showing!!”

“And?” she said. “Is that important?”

“Yeah, just a bit...” Sean said. “It means you waste 420 gallons of water just taking one shower!”

“What!” Rin shouted. “That’s not possible!
Is there any way to change that?” she
asked.

“Well... for one, you could replace me with a water saving shower head,” Sean said. “It’ll save you 4.5 gallons of water per minute...”

“Is there anything else I can do?”

“Taking a 10 minute shower instead of a 60 minute one will help a lot!” he replied

“Okay, I can do that!” Rin said.

Several days later, Rin was about to take a shower when she heard a voice calling her name. “Hi Sean!” she said. “How are you?” “Much better now that you’re taking shorter showers,” he replied. “Thanks for taking my advice, it really helps.” “No problem!” she replied.
