

REUSABLE

by Hanohano Pamatigan

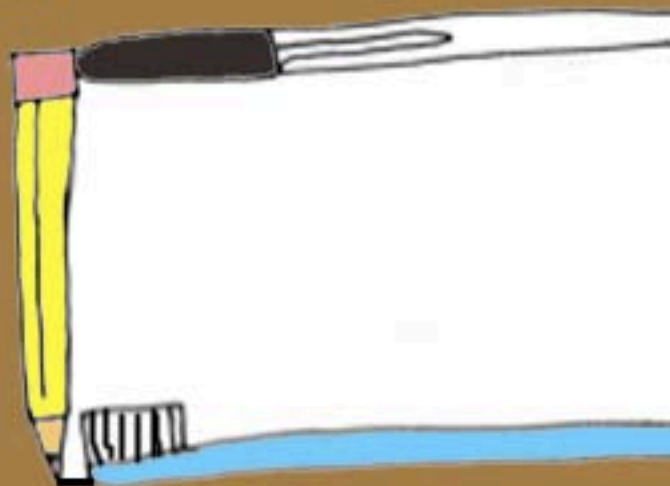

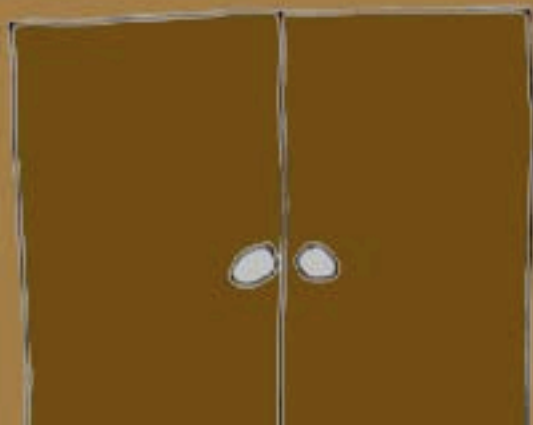

“Hello students, my name is Ms. Cola and I’ll be you substitue teacher for the day.” Says the teacher.

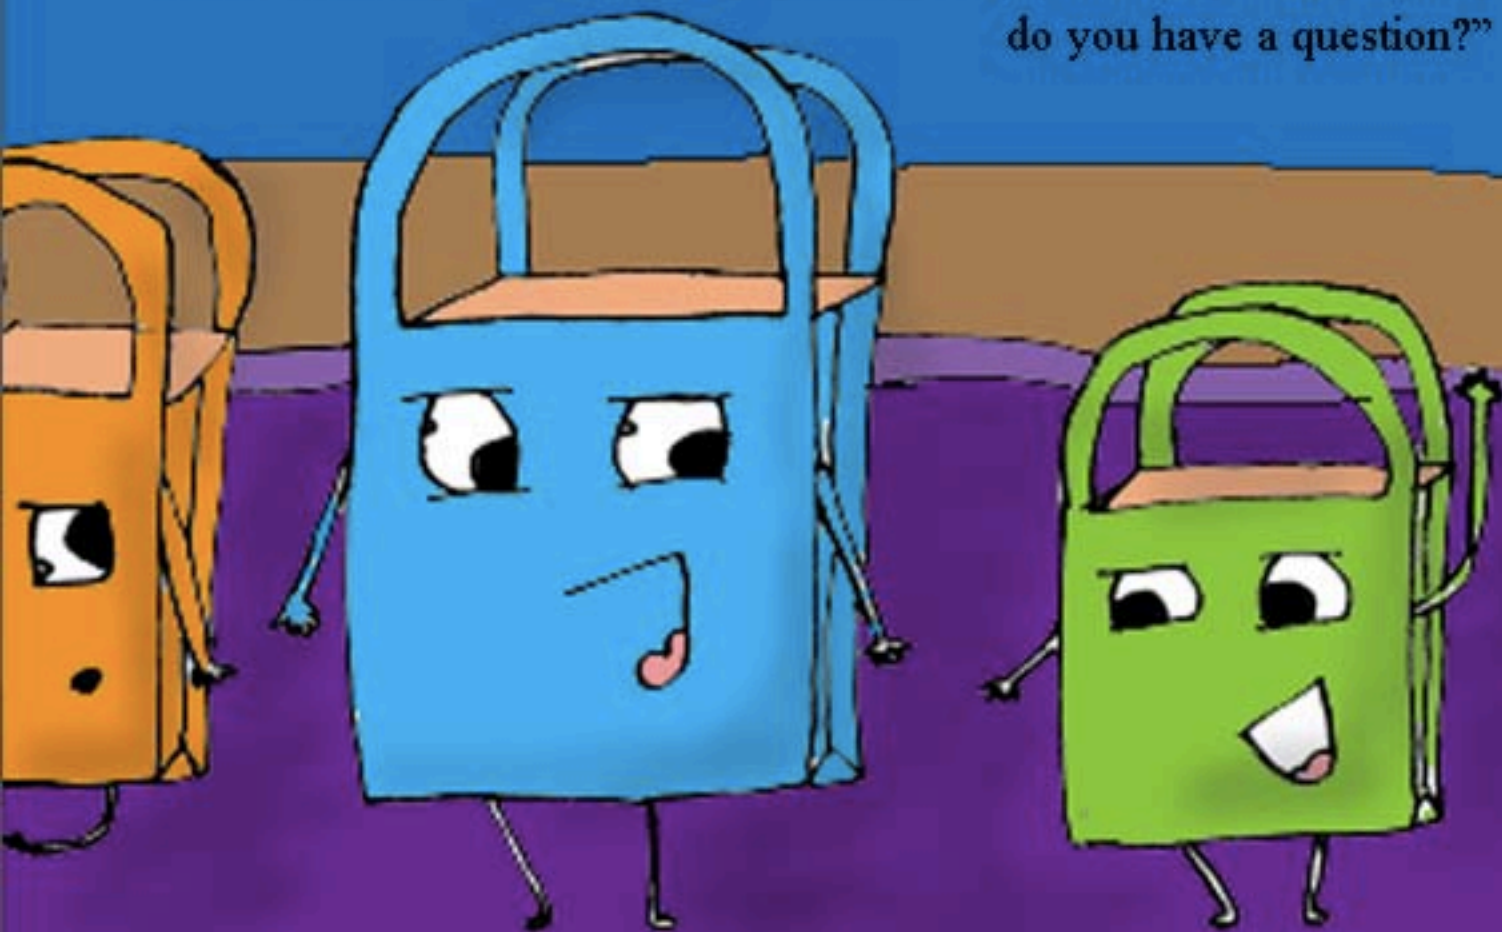

“We are going to learning what’s good and bad about the plastic and paper bags.” As the teacher continues.

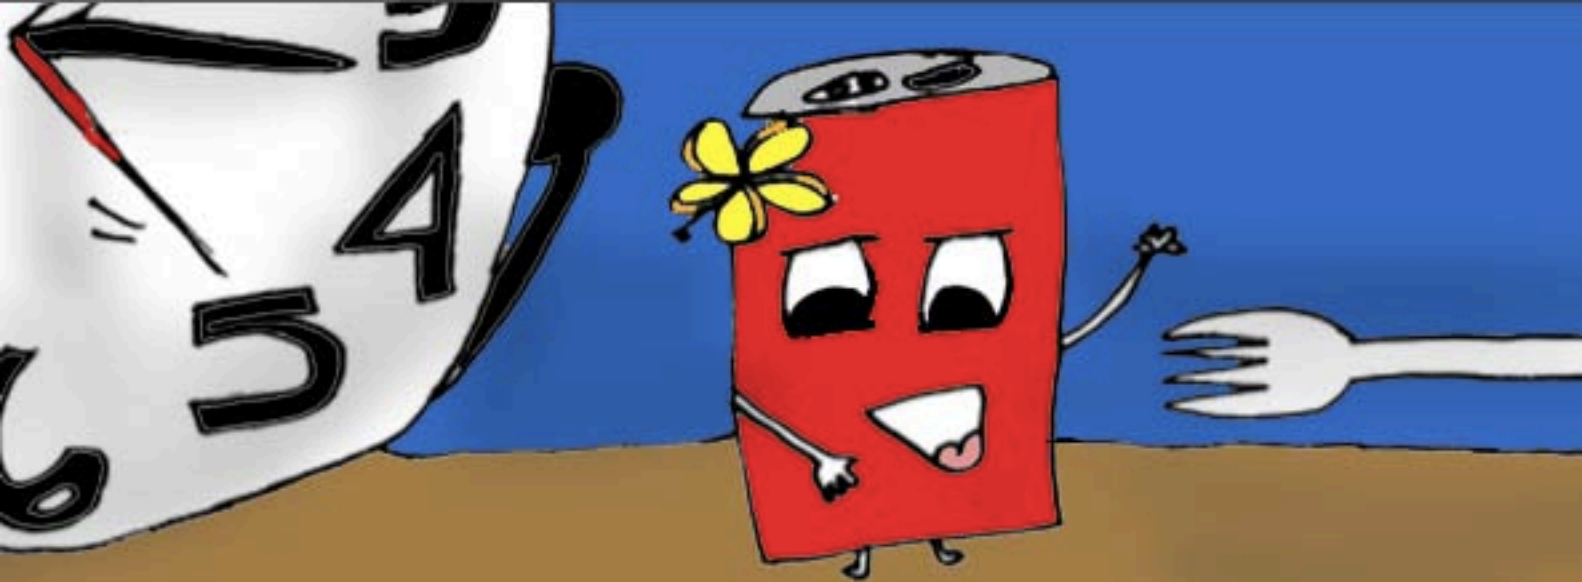

“Plastic bags are made from bad toxics. Reusable bags help the earth by using less plastic bags. Plastic bags also get washed into the ocean and animals mistaken it for food.”

The teacher says, "And some paper bags cannot be recycled, yes Mojo,
do you have a question?"

Mojo replies, "Yes, do we help save money?"

“Yes we do! Recycling helps the earth by saving our precious resources. Okay class that will be all for today. Have a nice weekend!”
Finally says Ms.Cola.

THE END
