

# KEEP OUT!!!

By:Taj-Destiny H. Vierra  
Kamehameha Middle School  
Grade 7

I'm really hungry, ooh is that a jellyfish?  
Ahh oh no I'm choking someone help!!!  
Ikaika look there is a turtle in need of our help!

There all better. Hi I'm Lehua, and this is my friend Ikaika,  
what's your name?  
Momi, thank you so much.

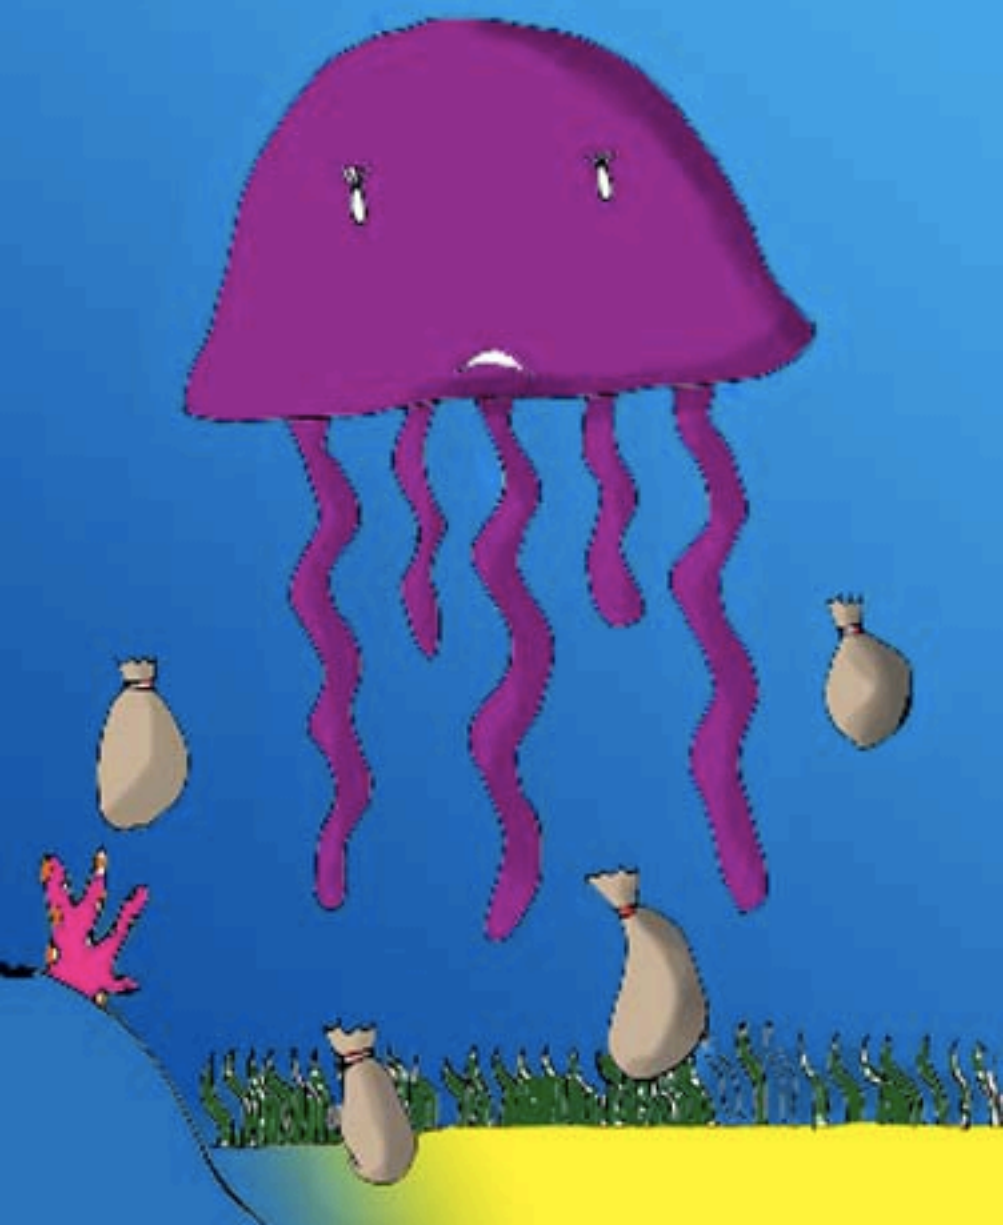

Momi, can you help us?

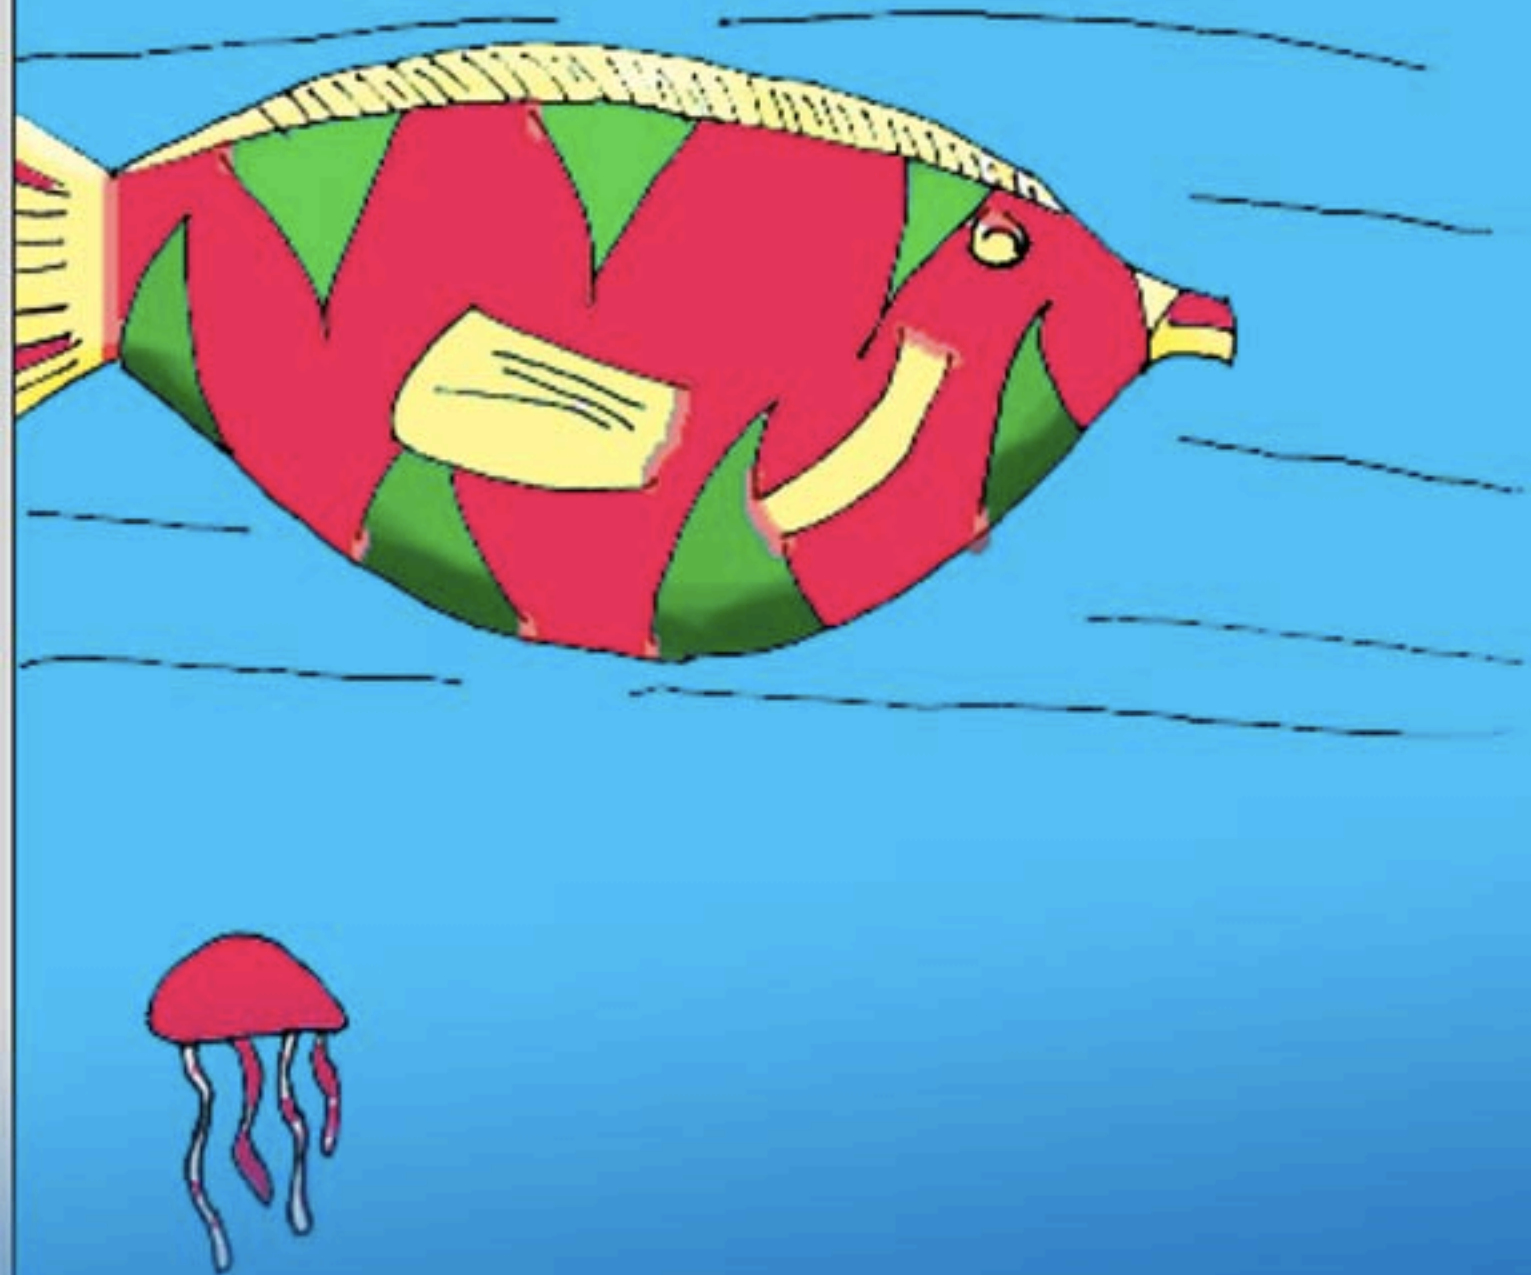

Well sure what is it, Lina the jolly jellyfish?

" Wolly the whale got stuck in a big pile of trash in the middle of the ocean, and she can't find her family, and she doesn't have much time.

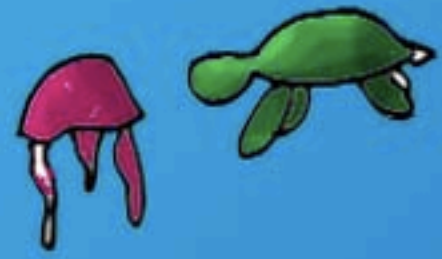

Yes lets go come on Aunty Lehua, and Uncle Ikaika!

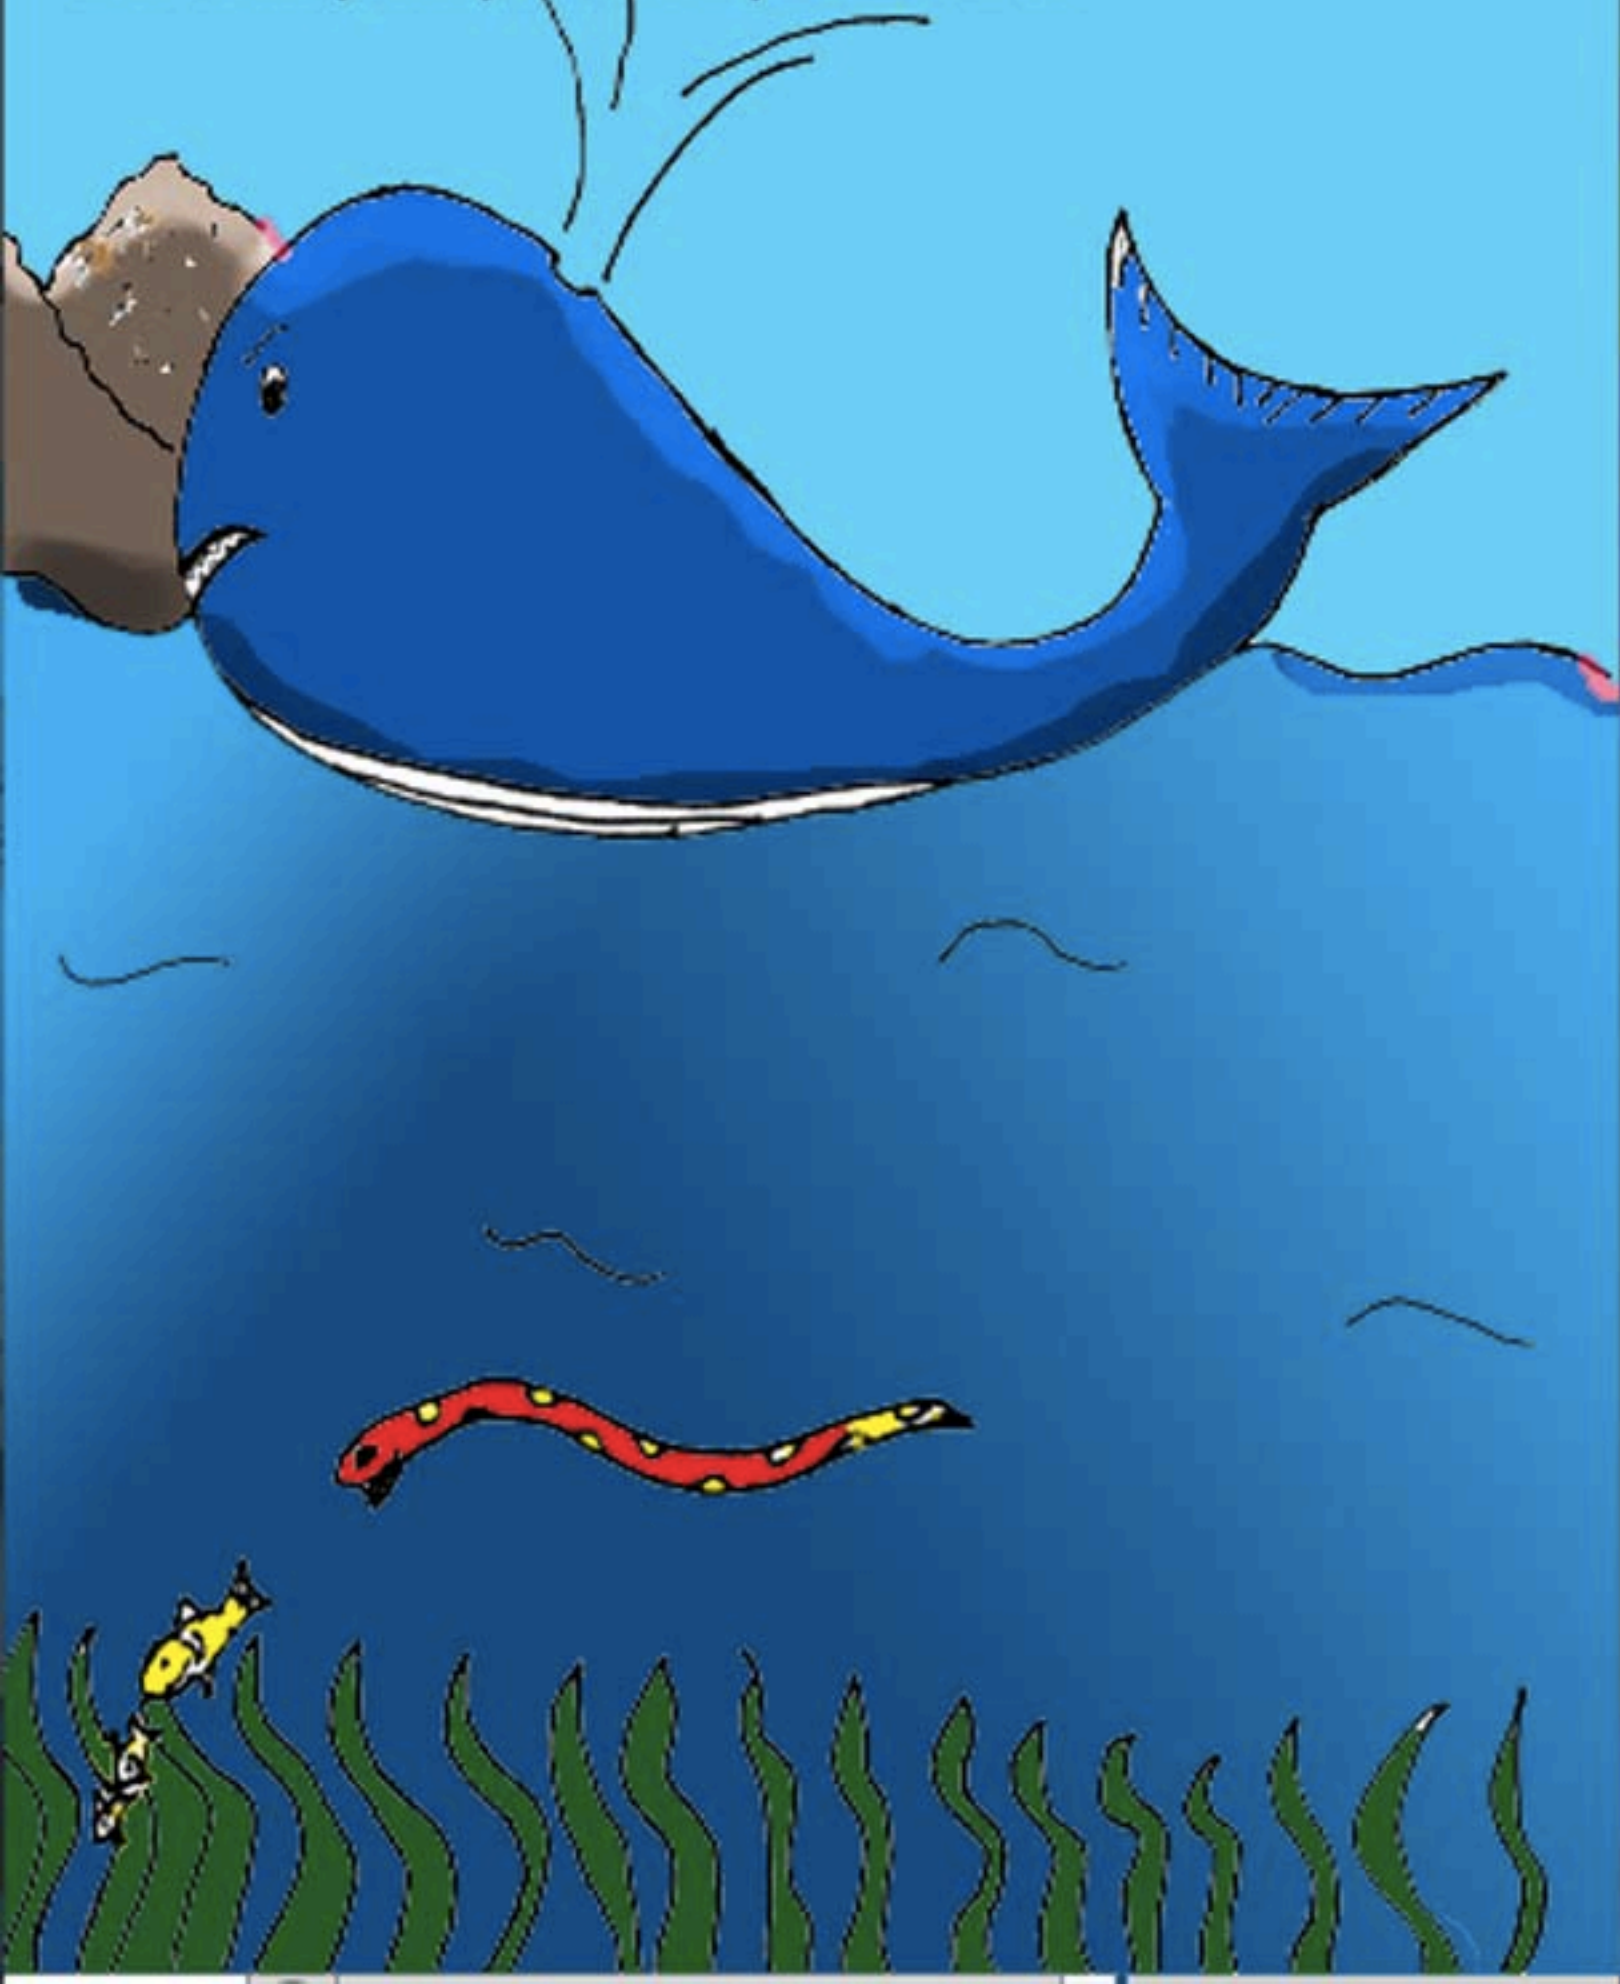

Wolly!..... Wolly!.... oh where oh where could you be?  
Oh hey hinahina were looking for Wolly. Would you like to help us?

Oh my what is all this trash in our waters? Please help us get every trash you see  
Did you know that trash, or plastic doesn't disappear, it just gets smaller and smaller.  
Ewww is that a cigaret bud? Oh no those are so dangerous.  
Did you know that it takes over 80 years for it to dissolve?

When you see trash like what I saw I mistook it for a delicious jellyfish but it was a plastic bag, so other sea animals could mistake the trash for food. Like turtles, seals, seahorses, and Whales.

When we pollute the water, we kill one of our most needed food sources then we won't have any fish.
