

UN PLUG it!!!

Little Sarah learned a valuable lesson one early morning before going to school. She learned something about electricity that she would never have learned about if it wasn't for the help from Erin, Mike, and Freddy.

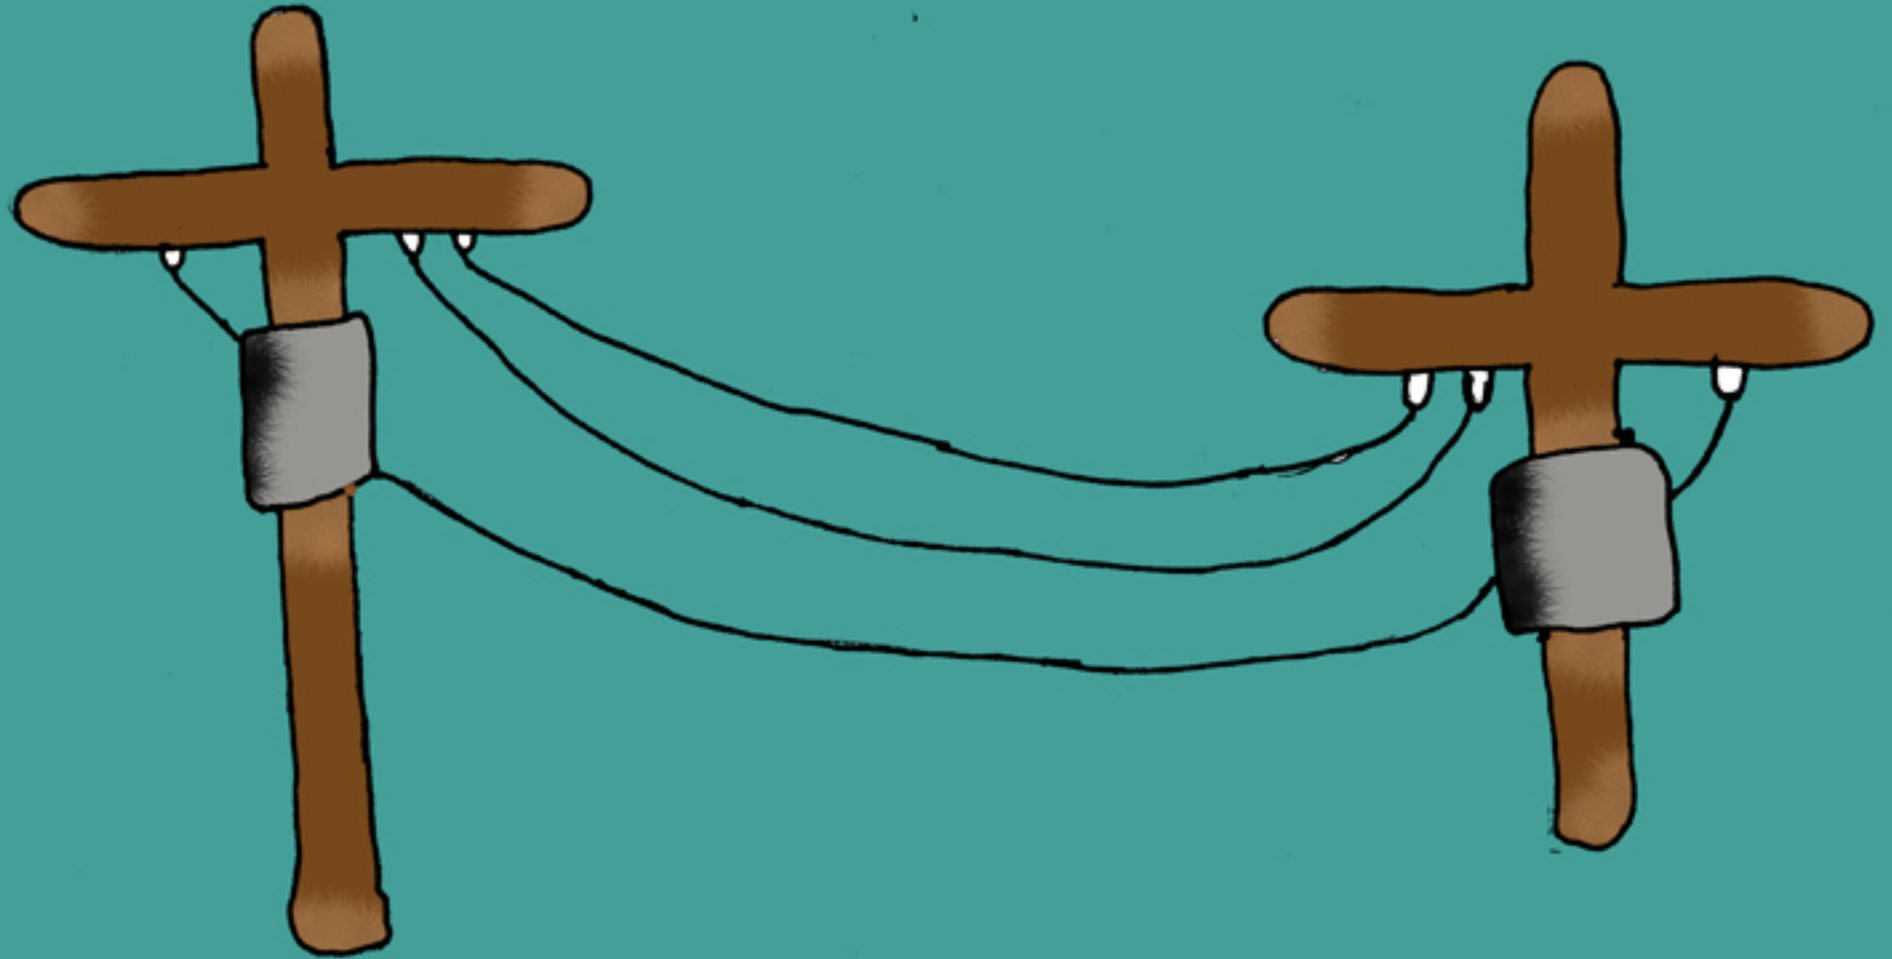

By: Matthew Yokota

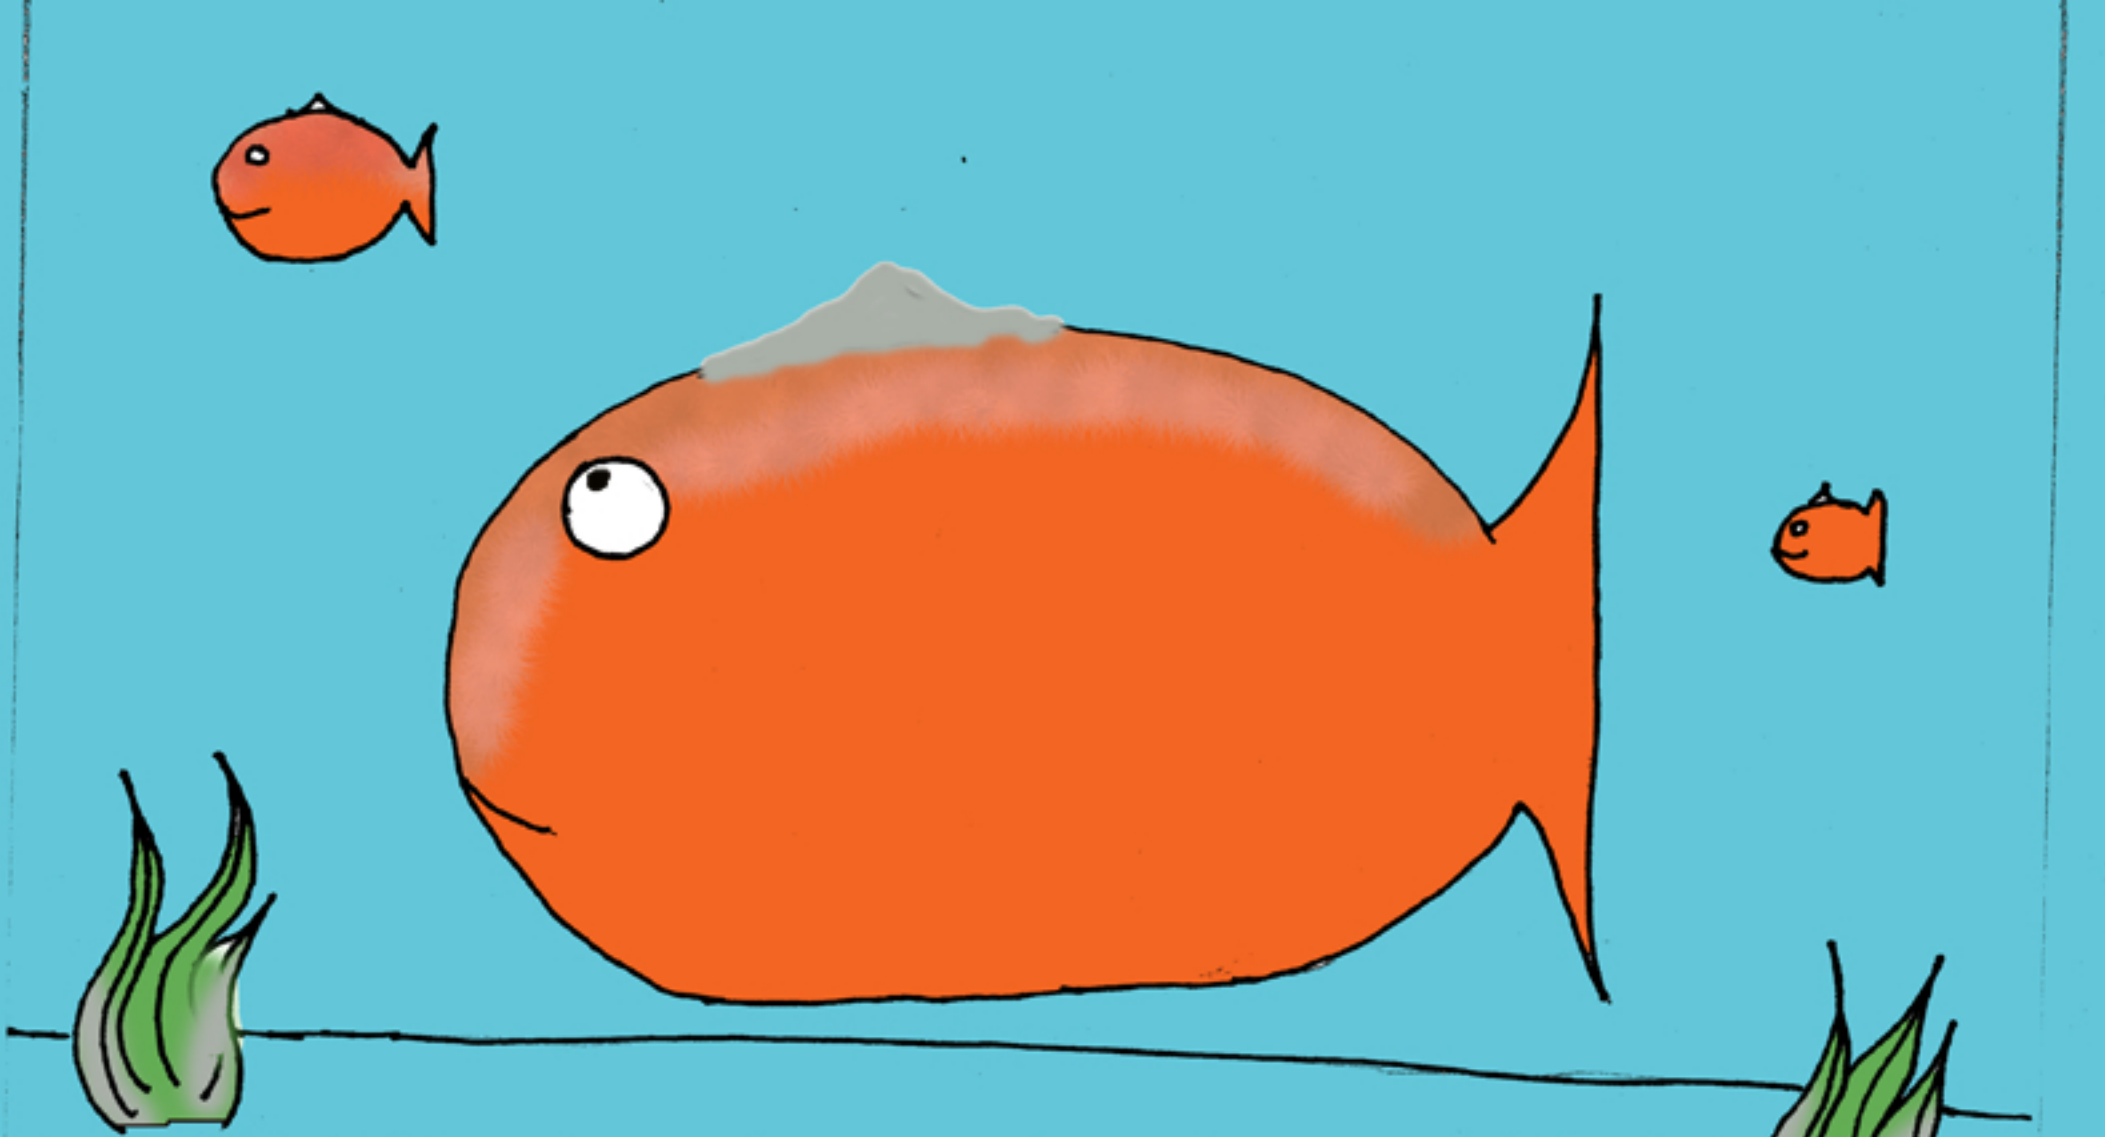

Sarah : (Sarah un-plugs her phone and leaves it in) "Bye Mom, I'm off to school."
Mom reply : "Bye have a nice day!"

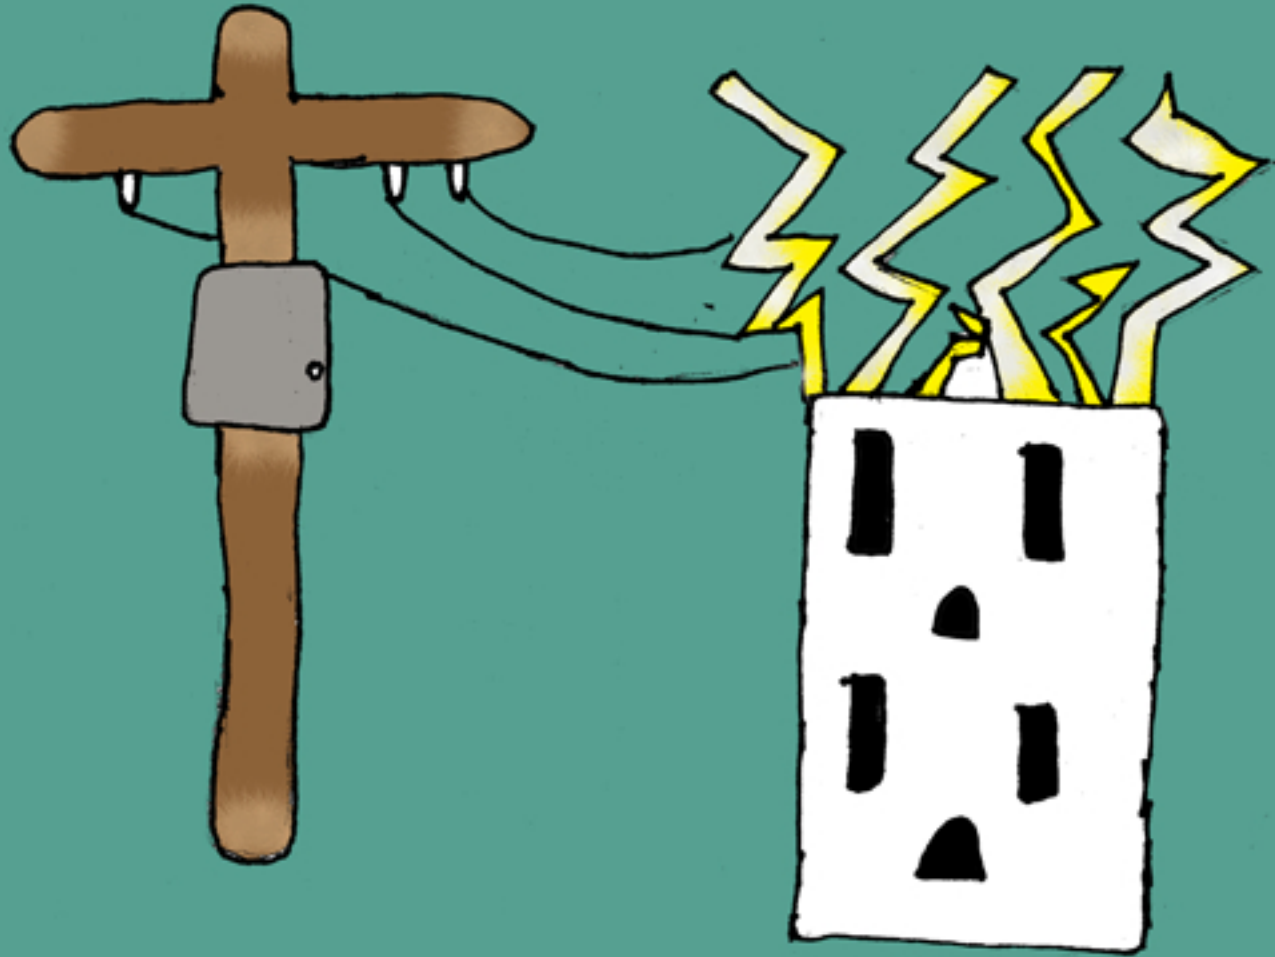

Mike (charger): "Hey Sarah, did you know that when you leave a charger in, You are wasting A LOT of energy!?!"

3 Erín (electricity): Yeah, you use 95% more of me if you are charging something. We need to save as much energy as we can before we don't have any electricity!!!

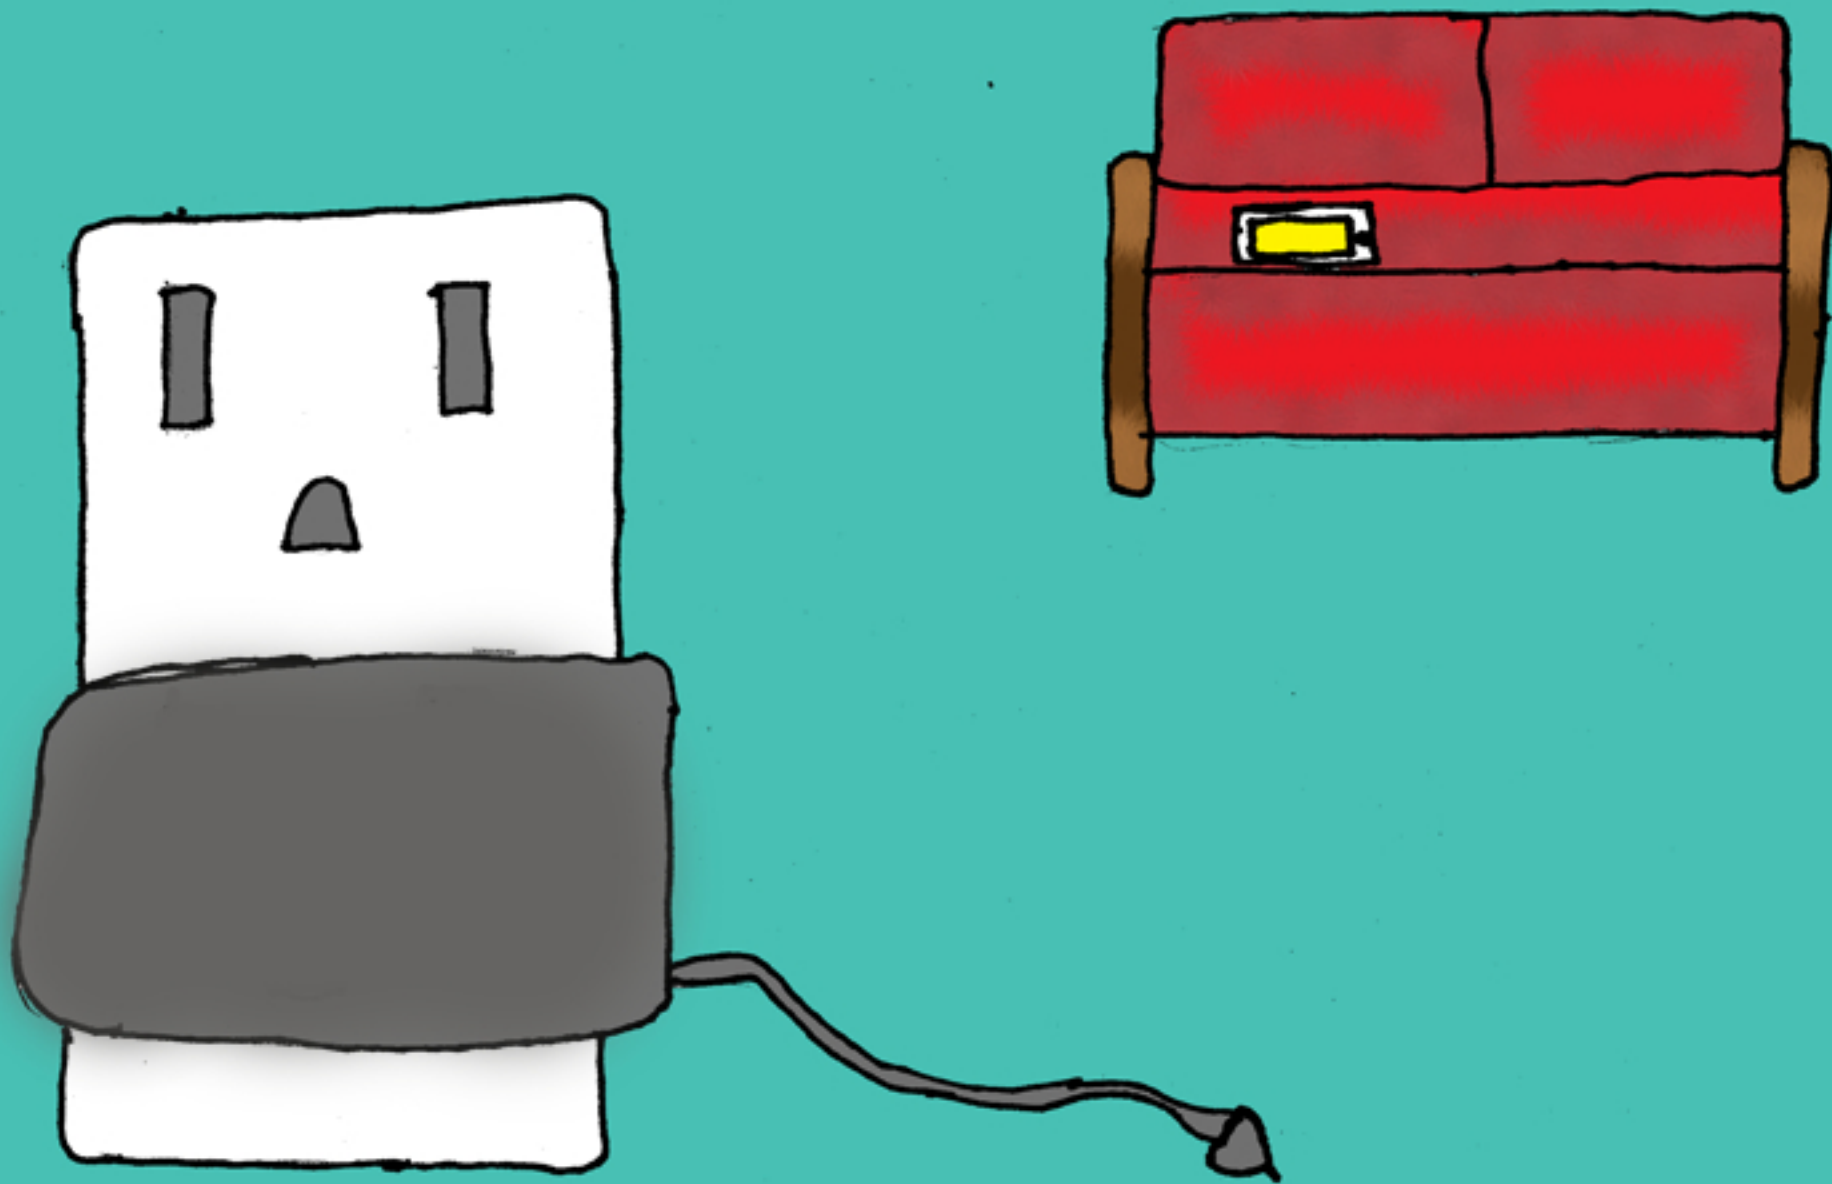

Freddy (fish); "Also when you leave your charger in you are killing fish because Sarah released bad things into the air when she left her charger in."

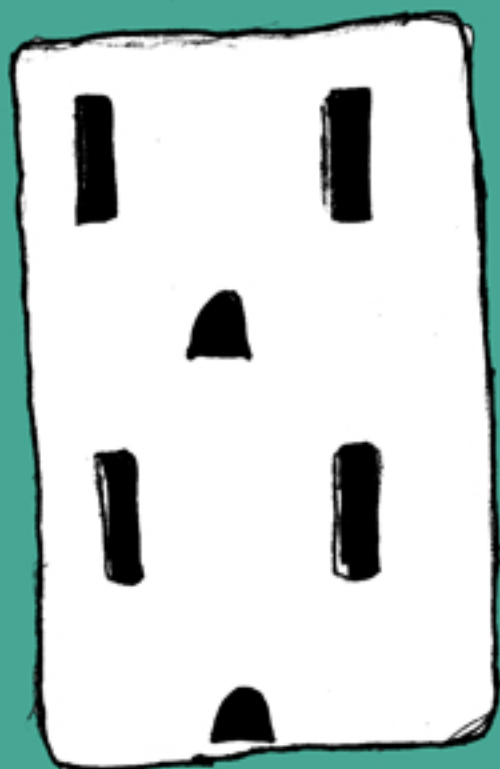

: Erin: "Did you also know Sarah that it is 5% of our nations electricity bill!"

Sarah : "Wow. I did not know any of this."

"These facts about what a charger left in a outlet can do!"

: "Everybody I am getting hot!! Feel me! I am still wasting energy as we talk. Sarah un-Plug me."

Sarah: "Okay Mike. Now I know always to un-plug my charger when I am not charging anything."

The End!

Now that Mike, Erin, Freddy have taught Sarah a big lesson on electricity and what she can do to stop global warming Sarah is now unplugging all of her chargers and anything left in a outlet.
Thanks to Mike, Erin, and Freddy.
