

21st Century Math:

What Parents Need to Know

The Importance of Math

Math is no longer simply a solitary subject in and of itself. Rather, its integration into multiple aspects of everyday life in the 21st century – from the use of technology to the paying of bills – makes it necessary to show students how it can be integrated with other subjects.

For example, elementary teachers can help students build their critical thinking and problem solving skills by asking them to look for a logical structure when solving math problems and back up their answers with verifiable evidence.

We would like to invite our Kindergarten through 5th grade parents to learn more about 21st Century Math with **Wes Yuu** (see bio below).

WHEN: Friday, April 7, 2017

WHERE: Charles Reed Bishop Learning Center (light refreshments to be served)

TIME: 6:00pm - 7:00pm

RSVP: By Friday, March 31, 2017:

Email: masaquin@ksbe.edu (Kumu Marcie) OR **Phone:** 982-0268
(include # of adults attending)

Wesley Yuu is the owner and consultant for YUUREKA Mathematics. Wesley provides professional development for mathematics teachers in elementary, middle, and high schools across the state. His goal is for the children of Hawai'i to see themselves as mathematicians who have the knowledge, skills, and confidence to tackle any problem that can be solved with mathematics.
