Long-Horned Beetle Life Cycle

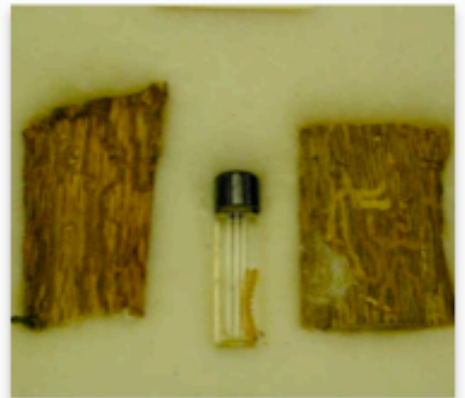

A Bug's Life Cycle Word Game

Long-Horned Beetle Description

The longhorn beetles have extremely long antennae, which are often as long as or longer than the beetle's body. The longhorn beetles are serious pests because the larvae bores into wood, where they can cause extensive damage to either living trees or untreated lumber.

Long-Horned Beetle

Interesting Facts

- * Adult beetles have two sets of wings.
- * Female beetles usually lay dozens or hundreds of eggs.
- * Most beetles only live for a year.
- * Beetles cannot see very well, so they communicate using pheromones, sounds or vibrations.
