

How to Make a Slide Show

First prepare your background music in iTunes.

1. Songs can be imported into iTunes via music CDs or by purchasing them online from the iTunes Music Store.
2. Create a “Playlist” folder by clicking on the “+” icon and name your playlist.
3. Drag and order selected songs from the iTunes Library into your playlist.

Create your slide show in iPhoto.

1. Connect the digital camera to the computer via the USB cable.
2. Select iPhoto to launch automatically whenever connected to a digital camera.
3. You may check the option box to erase your memory stick once the transfer is complete.
4. Click on “Import” to begin the transfer. The photos are stored in the “Photo Library.”
5. Create an “album” folder by clicking on the “+” icon and give your album a name.
6. Drag photos from your “Photo Library” into your album.
7. Click on the “Slideshow” icon in the bottom menu.
8. In the “Settings” mode, select your transition, direction, speed, and duration. There are other options available as well.
9. In the “Music” mode, check the box to play music during the slide show. In the “Source” menu, you have access to all of your iTunes playlists. Select one.
10. Save your settings.
11. To play your slide show, click on the play button located in the lower left corner.
12. Hit the “escape” key to stop the show.
