

Generate a QR Code in Google Chrome

01

Click on
Three Dots

While on the desired web page in Google Chrome, locate and click on the 3-stacked dots at the top-right corner of the window

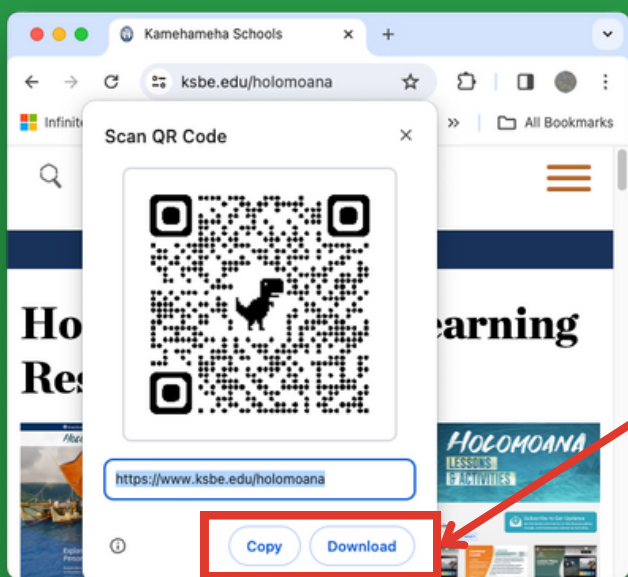

02

Hover over
"Save and
Share"

Click
"Create QR
Code"

A drop-down list will appear. Scroll to the bottom of the list and hover over "Save and Share" A new list will appear. Select "Create QR Code"

03

Select
"Copy" or
"Download"

A small pop-up will appear . Click on "Copy" or "Download" to use your QR code. You can also drag the image of the QR code to your desired workspace or app.
